Thanks Gudrun. I think we've worked through those timing constraints before, and have worked through individual responses that may take longer than 10 days on a case by case basis. Maybe we start out this way as the default and work to resolve any issues as they come up?

Hi Heather,

I think that would make a lot of sense, and I seem to recall we have proceeded that way before. At this point, the only wrinkle I can think of is that the response time under formal SC civ pro rules is 20 days, whereas in NCUC there is a customary 10-day response time. Also as you probably know, the NCUC opened a new docket for the 2020 IRPs, and we have not yet filed a petition to intervene on behalf of our clients in that docket (NRDC, SACE, Sierra Club).

Kate Lee and Tirrill Moore will also be on our IRP team, so I've added them.

Thanks,
Gudrun

Hi Gudrun and Blan-

Assuming SELC will participate in the NC and SC IRPs, we were wondering if it would make sense to have all data requests be issued for NC and SC and all responses designated for NC and SC? This made sense to us given that the documents are exactly the same. We thought this might alleviate burden on both SELC and our teammates.

If this question would be better posed to a colleague, please let us know that as well.

Heather
